對於中國房地產企業而言,如何面對 2016年的市場繁榮,並非一個輕鬆的話題。有時候,幸福與憂慮的邊界並非那麼 清晰。這一年中國房地產市場的總銷售規 模創造了歷史新紀錄,但這真的只是一件 值得慶倖的事情嗎?

必須看到,在主要城市房屋市場再度升溫的同時,土地市場的表現更為激進,麵粉貴過麵包不再是個案,而已經成了普遍現象。這足以令開發企業進退維谷,陷入焦慮之中。買高價地,意味著承擔未來的經營風險;不買,則可能現在就被擠出市場。

所以,當2016年10月,國家對部分熱點城市出臺針對性的調控政策時,我們有充分的理由感到欣慰,這一次調控是及時的,也是完全必要的。讓過熱的市場適度降溫,對穩健經營、有志於長期發展的企業來說,無疑是一個利好。

房子是用來住的,這是一個簡明的常識, 我們沒有理由不懂得。但另一個方面,從 絕大多數發達國家的歷史經驗來看,房屋 也很難完全避免成為一種投資標的。尤其 在不動產價格一次又一次上漲的過程中, 作為市場參與者的我們很容易在誘惑中迷 失。如果僅僅是持有資產就可以輕鬆 錢,我們還能否堅持,靠努力去創造真實 價值?

一直以來,萬科堅持「為普通人蓋好房子,蓋有人用的房子」。我們始終認為,房屋應該回歸居住屬性,房地產應該回歸實業屬性。面對市場的又一次亢奮,我們更應該不忘初心。

For property developers in China, the market boom in 2016 was not something to be taken lightly. Sometimes, there is not a fine line between content and disquiet. The total sales volume in China's real estate market reached record high during the year. However, is this really something worth celebrating?

One should pay attention to the fact that the heating up of property markets in major cities is not as drastic as that in land transactions. Property prices overtaken by land premium has become a common phenomenon rather than a rare case. This puts developers in a dilemma of acquiring expensive land lots to bear operational risk in the future or being forced out of the market due to lack of land bank.

It is for the aforementioned reasons we welcomed the State's introduction of specific austerity measures in certain overheated cities in October 2016. We believe this round of austerity measures was timely and absolutely necessary. Allowing overheated market to moderately cool down would undoubtedly benefit healthy enterprises that are keen on long-term development.

"Housing is for accommodation" is a simple common sense that we all should understand. However, learning from lessons of most developed countries, it is almost unavoidable for housing to be treated as an object of investment. Particularly following waves after waves of real estate price upsurge, we, as market participants, would easily lose our track of objective in front of temptation. If people could easily make money by holding assets, would we still be able to persist with our dedication to create true value?

All along, China Vanke has been insisting on "building quality housing for ordinary people, developing premises for accommodation". We firmly believe that property development should be back to its basics of offering houses for accommodation. In the face of yet another state of market euphoria, it is imperative for us to remember our initial motive for entering the industry.

我們必須時刻牢記,無論外部的環境如何 變化,為客戶提供更好的產品和服務,才 是我們作為企業最重要的使命。

按照中性預測,以在城市實現定居的實際城鎮化率衡量,我國還有超過二十個百分點的城鎮化空間。隨著新型城鎮化戰的實施,近兩億農村新生代人口將擺脱人一輩「候鳥式遷徙」的狀態,成為永永就下民。這些新市民絕大部分將集中在就入民。這些新市民絕大部分將集中在就入地,住房短缺的現象短期內並不會消失。我們的「三好住宅」,依然有著廣闊的市場空間。

為新市民提供有品質的住房和配套服務, 我們責無旁貸。但問題在於,面對日益高 企的地價,如何向市場提供新市民支付得 起的住房?我們當然知道,這不是一家企 業能夠獨力完成的任務,但這一點,卻也 並非我們選擇不作為的理由。

我們依然有很多機會,為此做出力所能及的貢獻。「軌道+物業」開發模式,是我們首先應該想到的努力方向。東京,是香港等人口稠密大都市的發展過程表明,規模立為一、大型的一、大型的人工。 (TOD)能夠高效銜接周邊城鎮、周邊城式市群,能增加核心都市圈住房有內域,是與人工。 對於一、大型的人工。 (TOD)能夠高效銜接周邊域, 一、大型的一、大型的人工。 (TOD)能夠高效銜接周邊域, 一、大型。 (TOD)的, (TOD)的 We must always bear in mind that no matter whatever changes in the external environment, providing customers with better products and services is an utmost important mission for Vanke as an enterprise.

According to neutral forecast and based on actual urbanization rate measured by population with household registration, our country has room for further urbanization by over 20 percentage points. With the implementation of the new urbanization strategy, nearly 200 million of new-generation rural migrants will shed the "temporary migrant" status of their parents, and become permanent urban residents. Most of these new urban residents will concentrate in developed conurbation with better employment opportunities. Therefore, in areas with influx of population, shortage of housing will continue in the short term. Our offering of "Good Houses, Good Services, Good Neighbourhood" still have promising market potential.

It is our obligation to provide new urban residents with quality housing and ancillary services. However, faced with rising land costs, how are we going to supply the market with affordable residence for new urban residents? We certainly understand that this is not a task that can be accomplished by a single enterprise; however, this should not be an excuse for our inactivity.

We still have ample opportunities to make capable contribution to the aforesaid scenario. The "Railway+Property" development model is the first direction we should strive to adhere to. As demonstrated by the development process of densely populated metropolises such as Tokyo and Hong Kong, the transit-oriented urban development model (TOD) with an emphasis on public transportation can effectively link up surrounding towns and megalopolises, to increase the effective supply of housing in core conurbations, and to reduce living costs. According to estimates by relevant authorities, by 2020, the total mileage of urban rail transit in China is expected to nearly double the level in 2015. This will provide a large number of new urban households with opportunities for settling down through home purchase at prices affordable by their income levels.

其次,積極參與房屋租賃市場的發展,也可為新市民提供更多可承受的住房。。租賃是國際大都市新市民解決居住問題,租實方式。如紐約、東京、倫敦都市圈,租房居住的佔比分別為56%、54%和50%。2016年國務院相繼出臺的《關於加快培育和發展住房租賃市場的若干意見》和《推動1億非戶籍人口在城市落戶方案》中高度強調了租賃在解決城鎮居民住房間要當中的重要意義。作為房地產行業的重要一員,我們當然應該積極回應。

除了住房本身,我們還應該看到,隨著年輕一代消費觀念轉變和互聯網時代的的東京,大量新出現的城市配套需求尚待得業,大量新出現的城市配套需求尚待得業。 滿足。養老、物流、教育、度假、創建。 新興不動產及服務領域,才剛剛起步區房 新興業態合計,相當於新打造一個房入 建行業。發達國家經驗表明,經濟進上 內對經濟發展的貢獻,不僅不會因供應務 所完工而削弱,反而會因各類衍生服務而 得到進一步強化。

我們依然面對廣闊的未來。而能否抓住這 些機會,則取決於我們的專業能力,取 決於我們能否以盡可能少的資源消耗,為 社會創造盡可能多的真實價值。我們很欣 慰,身處這樣一個充滿機遇的年代,也很 榮幸能與廣大股東一起,共同面對全新的 未來。 Second, by actively participating in the development of rental housing market, we can supply more affordable housing to new urban residents. Rental housing is the major tool for metropolis to resolve the housing issue of new urban residents. Take the example of conurbations such as New York, Tokyo and London; the proportion of rental housing is 56%, 54% and 50%, respectively. In 2016, the State Council promulgated the "Opinions on Accelerating the Cultivation and Development of Rental Housing Market" and the "Proposal for Pushing Forward the Household Registration of 100 Million Non-registered Residents in Urban Areas", with a key emphasis on the importance of rental housing in resolving housing issue of urban residents. As an important player of the real estate industry, we should definitely respond proactively to the State policies.

In addition to housing itself, we should also notice that, with changing consumer attitude of the younger generation and the emergence of the internet era, there exists an enormous demand for urban ancillary services which has yet to be fulfilled. Emerging real estate and services in areas of elderly service, logistics, education, resort, and new-start business are just in their infant stage. The aggregate volume of the aforementioned emerging businesses is equivalent to creating another real estate sector. As evidenced by the experience of developed countries, when the economics become mature, the pivotal position and economic contribution of the real estate industry in a broad sense will not be lessened due to abundant supply; on the contrary, it will be further strengthened by the emergence of various derivative services.

We continue to see a promising prospect. Our abilities to capture the aforementioned opportunities depend on our expertise and our ability to minimise resource consumption, in order to create maximum real value for the society. We are grateful to be in an era of ample opportunities, and are honoured to be able to embrace a brand new future together with our shareholders.

4.1 經營情況討論與分析

2016年內外部風起雲湧,是萬科32 年發展歷史上極為不尋常的一年。

從行業形勢看,全國商品住宅銷售規 模創歷史新高,大型房地產開發企業 的市場份額進一步提升。繁榮背後有 隱憂,熱點城市地價大幅上漲,「麵 粉貴過麵包 | 屢見不鮮,正在诱支行 業長期增長潛力。第四季度中央重申 要綜合運用金融、土地、財税、投 資、立法等手段,加強房地產長效機 制建設,讓住房回歸居住功能,各地 調控政策密集出臺,熱點城市樓市開 始降温, 對整個行業的發展影響深 遠。從公司自身看,始於2015年7月 的股權事件, 令公司的經營管理短期 內面臨前所未有的不確定性。部分股 東一度提議罷免全體董事、非職工代 表監事,公司股價大幅波動,部分客 戶、供應商、合作夥伴、金融機構以 及廣大投資者也產生了諸多疑惑。

4.1 Discussion and Analysis of Operation

2016 was a turbulent and uncommon year in the Company's 32-year development history.

Looking at the industry situation, the national scale of sales of commodity housing experienced a record high and the market shares of large real estate enterprises further increased. Behind all this prosperity, there were worries about the significant growth in land prices of popular cities. It was not uncommon that the cost per sq.m. would be higher than the expected selling price, eroding the long-term growth potential of the industry. In the fourth quarter, the central government reaffirmed the integrated use of various means such as finance, land, taxation, investment and legislation to improve the construction of long-term mechanism for real estate and restore the function of housing as residence. After the intensive implementation of policies of curbing, the market of popular cities began to cool down, bringing far-reaching implications to the development of the industry. Looking at the Company itself, the shareholding issue began in July 2015 created unprecedented uncertainties to the Company's operation and management in the short term. Certain shareholders had proposed the removal of all the directors and non-employee representative supervisors. The share price of the Company fluctuated substantially and it also resulted in distrust among certain customers, suppliers, partners, financial institutions and investors.

面對內、外部環境的挑戰,本集團 堅持「穩定隊伍,控制風險,實現可 持續發展」的原則,充分發揮事業 合夥人的中流砥柱作用,努力推動 各項業務穩定發展。2016年本集團 實現銷售金額人民幣3,647.7億元, 同比增長39.5%,銷售回款位居行業 首位; 實現歸屬於上市公司股東的 淨利潤人民幣210.2億元,同比增長 16.0%;年底淨負債率25.9%,持有 現金(包括受限資金)人民幣870.3 億元;本集團2014年以來圍繞「城市 配套服務商」定位而拓展的商業、物 流地產、滑雪度假、長租公寓、教 育、養老等新業務佈局也初現雛形。 2016年7月,本集團入選《財富》「世 界500強」,名列第356位。年內,公 司發行股份購買資產預案雖因股東層 面未能形成共識而宣告終止,但公 司並未放棄探索「軌道+物業」這一 極具發展潛力的發展模式。2017年1 月,地鐵集團以協定受讓的方式成為 公司重要股東,為公司踐行「軌道+ 物業」的發展模式奠定了良好基礎。

In the face of challenges in internal and external environments, the Group adhered to the principle of "workforce stabilizing, risk control and sustainable development", fully played the vital role of business partnership in maintaining stability and pushed forward stable development of the Company's various businesses. In 2016, the Group realized a sales amount of RMB364.77 billion, representing a year-on-year increase of 39.5%, ranking the first in the industry in terms of sales proceeds. Net profit attributable to the shareholders of the Company amounted to RMB21.02 billion, representing a year-on-year increase of 16.0%. Net gearing ratio at the end of the year was 25.9%. Cash in hand (including restricted cash) amounted to over RMB87.03 billion. The new business layout in commerce, logistic properties, ski holiday, long-term rental apartments, education and pension developed with the Group's centering on being an "integrated urban service provider" since 2014 has begun to take shape. In July 2016, the Group was listed on Fortune Global 500, ranking 356th. During the year, the Company's proposal of acquiring assets by way of issuance of shares was terminated because shareholders could not reach a consensus. However, the Company continued to explore the development model of "Railway + Property" with great development potential. In January 2017, SZMC became a significant shareholder of the Company by way of transfer agreement, laying a solid foundation for the implementation of the Company's development model of "Railway + Property".

In this year, the central government will continue to implement policies according to cities to prevent market overheating and began formulating longterm mechanisms for promotion of steady and healthy development of the property market. It will provide a larger room for development for enterprises with sound operation and professional abilities for development. Vanke has been insisting to "building quality housing for ordinary people and building housing acceptable for occupation". It always advocates restoration of living function of housing and industrial nature of real estates, which is in line with the position of real estates set by the central government. The Group sincerely hopes that the shareholding issue will be resolved as soon as possible, allowing the Group to be back on track for normal operations and creating larger values for shareholders and the society.

4.1.12016年房地產市場回顧

全國商品住宅市場繼續回升,但第四季度增速有所放緩。國家統計局資料顯示,2016年全國國品住宅額是 國商品住宅額信工,較2015年分別增長22.4%和36.2%,銷售規模創歷史品之24.4%和36.2%,銷售規模國商品生宅銷售面積同比分別增長35.6%、24.7%和24.9%,調控政策出臺顯於緩。

在售庫存下降,但各城市總體供需 關係分化仍較為明顯。隨著2015 年、2016年成交大幅反彈,部分城 市市場庫存去化週期大幅縮短。以 公司長期觀察的14城市為例,由於 2015-2016年商品住宅成交持續增 長,新房供應下降,庫存(已取得銷 售許可、尚未售出的面積)已由2014 年底的1.55億平方米降至2016年底 的0.93億平方米;庫存去化週期由 2014年底的11.5個月縮短至2016年 底的6.9個月。但綜合評估存量住房 規模、土地供給和未來人口增長等因 素,我國住房供給整體較為充裕、各 城市住房供需關係分化、短缺屬於局 部現象的長期判斷仍未出現變化。

局部市場過熱引發政策關注。2016年3月,部分城市開始收緊房貸政策,以遏制房價過快上漲。為遏制投資需求,避免資產泡沫,防範市場場險,國慶前後,超過20個城市密、險豐期控政策,包括重啟限購入資等。伴隨一系列措施的落地,熱點城市樓市快速降溫。

4.1.1 2016 Property market review

The commodity housing market in the country continued to improve but the growth rate slowed down in the fourth quarter. According to the data from the National Bureau of Statistics of China, sales area and sales amount of commodity housing in the country in 2016 amounted to 1.38 billion sq.m. and RMB9.9 trillion, representing an increase of 22.4% and 36.2% as compared with that in 2015 respectively, with a record high in the scale of sales. Of which, the sales area of commodity housing in the country for the first three quarters recorded year-on-year increase by 35.6%, 24.7% and 24.9% respectively, and the year-on-year growth in the fourth quarter was 13.4% which significantly slowed down due to the release of policies of curbing the real estate sector.

Despite the decline in sales of inventory, there was still obvious variation between the overall demand and supply in various cities. With the significant rebound in amount of transactions in 2015 and 2016, the duration for the market to absorb housing inventory in some cities had been substantially shortened,. For instance, in the 14 Cities, due to the continuous increase in transactions of commodity housing in 2015-2016, the supply of new housing decreased, the inventory of new housing (i.e. those area that had already obtained sales permit but not yet sold) decreased from 155 million sq.m at the end of 2014 to 93 million sq.m. at the end of 2016, while the duration for the market to absorb housing inventory had been shortened from 11.5 months at the end of 2014 to 6.9 months at the end of 2016. However, with integrated assessment on the factors such as the size in housing inventory, land supply and future growth in population, overall housing supply in the country was sufficient while there were no specific changes in the variation between supply and demand in cities and the long-term judgement of shortage as a partial phenomenon.

Local market overheating triggered concerns over policy. In March 2016, some cities began to tighten mortgage policies to prevent the housing prices from growing too fast. In order to suppress investment demands, avoid asset bubble and prevent market risks, before and after the National Day, over 20 cities intensively implemented of policies of curbing the real estate sector, including resumption of purchase restrictions, limitation in loans, strengthening market regulation and tightening the industry financing channels. With the implementation of a series of measures, the property market in popular cities cooled down rapidly.

主要城市土地市場持續高溫。前述14城市的住宅(含商住)土地供應面積、成交面積同比分別僅增長3.4%和8.4%,而平均土地成交單價則增長34.3%,再次刷新歷史記錄;土地溢價率(成交土地的平均實際成交樓面價超過平均起拍樓面價的部分/成交土地的平均起拍樓面價)也一路攀升,於第三季度達到110%的高位。

全國房地產開發、投資情況相比 2015年的低迷有所好轉,但增速仍 在低位。全國住宅開發投資完成額約 人民幣6.9萬億元,同比增長6.4%; 住宅新開工面積約11.6億平方米,同 比增長8.7%,增速較上半年下降5.3 個百分點。

Constant overheating of land market in major cities. The area supplied and the area transacted for residential units in the 14 Cities (including mixed use) grew by merely 3.4% and 8.4% respectively and the transaction price of land increased by 34.3%, reaching new height again. The land premium rates (the average actual transaction price of floor area minus the average starting price/average auction price of floor area for land transactions) continued to increase and reached the peak value of 110% in the third quarter.

The property development and investment across China showed improvement from the slump in 2015 but in a slow rate. Investment in residential property development in China was approximately RMB6.9 trillion, representing a year-on-year growth of 6.4%. Floor area of new construction of housing was approximately 1.16 billion sq.m., representing a year-on-year growth of 8.7%, which was 5.3 percentage points lower than that in the first half of the year.

The operational model of developers needed transformation. As the problem of urban housing shortage was basically solved, the demands for real estates was increasing diversified and the dominance of demand for purchasing new home came to an end. Under the situation of constant overheating of land markets and the increasing burden of soaring land price on stable housing price, the operational model of developers of land acquisition, construction and sales became more unsustainable. Amidst challenges in traditional model, leading the urban redevelopment and renewal projects through urban rail transit construction and providing real estate-related services such as property services, commercial operation, long-term rental apartments, education and vacation and pension businesses based on the urban ancillary needs have been showing great potential.

為配合公司的國際化戰略推進及中國 境內房地產業務的跨境並購,本集團 持續擴大境外融資規模,通過多種方 式在境外籌措資金。 After taking into account the effect on deferred taxation, the asset impairment provision made during the current year affected the net profit after tax during the Reporting Period by RMB670 million and profit for the year attributable to the shareholders of the Company by RMB540 million.

As of the end of the Reporting Period, the capital commitments of the Group reached RMB140.94 billion, including the construction contracts entered into or to be executed by the Group, as well as the land contracts signed.

7. Risk of fluctuations in exchange rates

The Group conducts a majority of its business operations in the PRC.

In order to coordinate with the global developing strategy of the Company and cross-border merger and acquisition of real estate business in the PRC, the Group continued to expand its foreign financing scale and raised funds abroad in various ways.

8. 主要資產被查封、扣押、凍結的情況

無。

9. 主要財務指標變動情況

As the Group mainly carried out cross-border merger and acquisition of real estate business in the PRC in the second half of the year and the significant fluctuation in exchange rates in Renminbi to US dollar and HK dollar resulted in a substantial depreciation in the same period, the Group generated an exchange loss of approximately RMB570 million during the reporting period.

To constantly control the risk of fluctuations in exchange rates, the Group conducted dynamic management on asset/liability matching, liability period and foreign liquidity risk and adopted various hedging instruments to cover exchange rate exposure risk. The change in the DF and NDF value will not have any impact on the Group's profit and loss for the period.

4.1.4未來發展展望

1. 外部環境

短期來看,市場環境依然複雜。熱點城市和三四線城市持續分化,土地市場的調整滯後於住宅市場,以及行業自2016年底以來的去槓桿趨勢,都加大了企業經營的不確定性。

長遠來看,房屋回歸居住屬性是大勢 所趨。2016年12月,中央經濟工作 會議明確提出「房子是用來住的」,並表示將綜合運用來 是用來炒的」,並表示將綜合運用金 融、土地、財稅、投資、立法等 設,加快研究建立符合國情、適應 場規律的基礎性制度和長效機制。 場 場 提供重要的制度保障。

隨著城市發展以及居民生活水準提 高,在城市配套服務領域也存在著大 量未被充分發掘的物業需求。以商業 地產為例,儘管近年來商業地產行業 已進入調整期,數字化和電商發展進 一步加快了優勝劣汰,但依託一二線 城市持續高速增長的消費購買力,定 位精准、注重體驗消費、業態豐富的 新型購物中心仍保持了快速發展。與 此同時,一批新生的業態也迎來發展 良機。2016年,政府明確提出加快 發展租賃市場,落實金融、土地、財 税等方面的支持政策,大力培育機構 化、規模化的住房租賃企業;在政府 的大力支持下,特色小鎮的培育工作 也已在全國範圍內展開。隨著國內新 一輪軌道交通建設高峰的到來,以 「軌道+物業」為代表的聯動開發模式 也為企業提供了巨大的想像空間。可 以預見的是,行業未來的產品類型、 開發模式將日益豐富。

4.1.4 Future development prospects

1. External environment

In the short term, the market environment will still be complicated. Segmentation between popular cities and third- and fourth-tier cities will remain. The adjustment in land market lags behind that in the property market. Deleveraging process in the industry since the end of 2016 also enhanced the uncertainty in operation.

In the long term, the housing returning to the residential nature is the trend. In December 2016, the Central Economic Work Conference clearly proposed the concept that "housing is built for living instead of speculation", and stated that it will integrate the methods related to finance, land, business tax, investment and legislation and speed up the establishment of fundamental system and long-term mechanism in line with national conditions and adapting to the market trend. The implementation of these measures will provide system protection for the long-term healthy development of the industry.

With increasing urban development and living standard, there is large property needs that have not been fully exploited in the area of urban service. Taking commercial properties as example, although the commercial property industry has entered the adjustment period recently, digitalization and electric development further accelerated the survival of the fittest, the new shopping centers still maintained rapid development with rapidly increasing purchasing power in the first- and second- tier cities, accurate positioning and focusing on consumption experience. Meanwhile, the emerging business forms also bring development opportunities. In 2016, the government clearly proposed to accelerate the development the rental market through implementation of supportive policies in relation to finance, land and business tax, cultivation of institutionalized and large-scale housing rental enterprises. Under the strong support from the government, the establishment of special towns has been launched in the country. With the coming construction peak of rail transit in the country, the collaborative development model featuring "Railway + Property" provided room for imagination for enterprises. It is expected that the product types and development models of the industry in future will increase.

The key audit matter

在確定存貨可變現淨值過程中,管理層需對每個擬發展物業和在建物業達到完工狀態時將要發生的建造成本作出最新估計,並估算每個存貨項目的預期未來淨售價(參考附近地段物業項目的最近交易價格)和未來銷售費用以及相關銷售稅金等,該過程涉及重大的管理層判斷和估計。

The calculation of the net realisable value of inventories involves significant management judgement and estimation in preparing the updated estimations of the costs to complete each property development project for PHD and PUD as well as in assessing the expected future net selling prices for each property development project (with reference to recent sales transactions in nearby locations), the estimated future selling costs and the relevant taxes.

我們把存貨的可變現淨值的評估列為關鍵審計事項,因為存貨對貴集團資產的重要性,且估計存貨項目達到完工狀態時將要發生的建造成本和未來淨售價存在固有風險,特別是考慮到當前的經濟環境在各個城市推出的各種針對物業市場的措施。

We identified the assessment of net realisable value of the Group's inventories as a key audit matter because of the significance of inventories to the assets of the Group and because of the inherent risks involved in estimating the costs to complete each property development project and the future selling prices for each property development project, particularly in light of the current economic circumstances and various property market measures introduced in various cities across Mainland China.

我們的審計如何處理該事項

How the matter was addressed in our audit

- 評價管理層所採用的估值方法,並將估值中採用的關鍵估計和假設,包括與平均淨售價有關的關鍵估計和假設,與市場可獲取資料和貴集團的銷售預算計畫進行比較;
- evaluating the valuation methodology adopted by management for assessing the net realisable value of inventories and comparing the key estimates and assumptions adopted in the valuations, including those relating to average net selling prices, with market available data and the sales budget plans maintained by the Group;
- 將各存貨項目的估計建造成本與貴集團的最新預算進行比較,並將截止2016年12月31日發生的成本與截止2015年12月31日的預算進行比較,以評價管理層預測的準確性和預算過程;
- comparing the estimated construction costs to complete each property development project with the Group's latest budgets and comparing the costs incurred to 31 December 2016 with budgets as at 31 December 2015 to assess the accuracy of management's forecasting and budgeting process;
- 進行敏感性分析,以確定關鍵估計和假設單獨或組合出現何種程度的變化會導致存貨發生重大錯報,並考慮關鍵估計和假設出現此類變動的可能性以及潛在的管理層偏向。
- performing sensitivity analyses to determine the extent of changes in key estimates and assumptions that, either individually or collectively, would be required for inventories to be materially misstated and considering the likelihood of such a movement in those key estimates and assumptions arising and the potential for management bias in their selection.

土地增值税的計提

Provision for land appreciation tax ("LAT") in Mainland China

請參閱綜合財務報表附注7、 28及附注2(b)(ii)的會計判斷與估計

Refer to notes 7 and 28 to the consolidated financial statements and the accounting judgement and estimates in note 2(b)(ii).

關鍵審計事項

The key audit matter

貴集團應繳納的主要税項之一為土地增值税。 LAT in Mainland China is one of the main components of the Group's taxation charge.

貴集團銷售開發的物業需要就土地增值額按照超率 累進税率30%-60%繳納土地增值稅。在每個財務報 告期末,管理層需要對土地增值稅的計提金額進行 估算,在作出估算的判斷時,主要考慮的要素包括 相關稅務法律法規的規定和解釋,預計的銷售物業 取得的收入減去預計可扣除的土地成本、物業開發 成本、利息費用、開發費用等。貴集團在土地增值 稅匯算清繳時,實際應付稅金可能與貴集團預估的 金額存在差異。

LAT is levied on sale of properties at progressive rates ranging from 30% to 60% based on the appreciation of land value. At the end of each financial reporting period, management estimates the provision for LAT based on its understanding and interpretation of the relevant tax rules and regulations and the estimated total sales of properties less total deductible expenditure, which includes lease charges for land use rights, property development costs, borrowing costs and development expenditure. When the LAT is subsequently determined, the actual payments may be different from the estimates.

我們的審計如何處理該事項

How the matter was addressed in our audit

我們就土地增值税的計提的審計程序包括以下程 序:

Our audit procedures to assess the provision for LAT in Mainland China included the following:

- 評價管理層與計量預計的土地增值稅相關的 關鍵內部控制的設計和運行有效性;
- assessing the design, implementation and operating effectiveness of key internal controls over the calculation of the estimated LAT provisions;
- 利用本所內部稅務專家的工作,評價貴集團 於2016年12月31日的土地增值稅的計提,包 括基於我們的經驗、知識和對各地方稅務機 關就相關稅法應用的實務操作的理解,評估 貴集團的假設和判斷;
- engaging our internal taxation specialists to evaluate the Group's LAT provisions as at 31 December 2016 which involved challenging the Group's assumptions and judgements based on our experience, knowledge and understanding of the practices of the application of the relevant tax laws by the various local tax bureaus;
- 評價管理層對預計銷售物業取得的收入及可 扣除項目金額的估計,評估管理層的假設和 判斷;
- challenging the Group's assumptions and judgments based on our assessment of the value of the estimated sales of properties and the deductible expenditure;

關鍵審計事項

We identified the recognition of revenue for PDP as a key audit matter because of its significance to the Group and because small errors in recognition of revenue, in aggregate, for each property development project could have a material impact on the Group's profit for the year.

我們的審計如何處理該事項

How the matter was addressed in our audit

- 就本年確認房產銷售收入的項目,選取樣本,檢查買賣合同及可以證明房產已達到交付條件的支持性檔,以評價相關房產銷售收入是否已按照集團的收入確認政策確認;

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Auditor's responsibility for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

獨立核數師報告 Independent Auditor's Report

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content
 of the consolidated financial statements, including the
 disclosures, and whether the consolidated financial
 statements represent the underlying transactions and
 events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, related safeguards.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1 Significant accounting policies (Continued)

(b) Basis of preparation of the financial statements

The consolidated financial statements for the year ended 31 December 2016 comprise the Company and its subsidiaries (together referred to as the "Group") and the Group's interest in associates and joint ventures.

The measurement basis used in the preparation of the financial statements is the historical cost basis except that the following assets and liabilities are stated at their fair value as explained in the accounting policies set out below:

- financial instruments classified as available-for-sale (see note 1(h)); and
- derivative financial instruments (see note 1(i)).

The preparation of financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by management in the application of IFRSs that have significant effect on the financial statements and major sources of estimation uncertainty are discussed in note 2.

(d) 子公司及非控股權益

子公司指本集團控制之實體。當本集團藉參與某實體業務而承擔風險或有權獲取浮動回報,以及能夠運用其對該實體的權力以影響該等回報金額,即屬控制該實體。評估本集團是否擁有權力時,僅考慮實際權利(由本集團及其他人士持有)。

於子公司的投資自控制權開始之日直 至控制權終止之日合併計入綜合財務 報表。集團內公司間結餘、交易及現 金流量以及集團內公司間交易產生的 任何未變現利潤在編製綜合財務報表 時悉數撇銷。集團內公司間交易產生 的未變現虧損則僅在並無出現減值證 據時以撇銷未變現收益相同的方式撇 銷。

非控股權益指並非直接或間接歸屬於 本公司的子公司權益,且本集團並無 就此與該等權益持有人協定任何額外 條款,致使本集團整體須就該等符合 金融負債定義的權益承擔合約責任。 就各業務合併而言,本集團可選擇 公允價值或按非控股權益分佔子公司 可識別淨資產的比例計量任何非控股 權益。

1 Significant accounting policies (Continued)

(d) Subsidiaries and non-controlling interests

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Company, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. For each business combination, the Group can elect to measure any non-controlling interests either at fair value or at the non-controlling interests' proportionate share of the subsidiary's net identifiable assets.

1 重要會計政策(續)

(d) 子公司及非控股權益(續)

非控股權益於綜合財務狀況表的權益內呈列,與本公司股東應佔權益獨立呈列。本集團業績的非控股權益乃於綜合損益表及綜合損益及其他全面收益表列作本公司非控股權益及股東定間本年度損益總額及全面收益總額之分配。非控股權益持有人提供的資款及對該等持有人承擔的其他合約責任根據附註1(s)或(t)視乎責任性質於綜合財務狀況表中列作金融負債。

倘本集團於子公司的權益變動不會導致失去控制權,則作為股權交易入 賬,據此,綜合權益內的控股及非控權益金額會作出調整,反映相關權益 變動,惟不會調整商譽亦不會確認損 益。

本集團失去對子公司的控制權時,將按出售於該子公司全部權益入賬,所產生的損益於損益中確認。失去控制權之日仍保留的該前子公司權益按公允價值確認,相關金額視為初步確認金融資產的公允價值(見附註1(h)),或(如適用)初步確認於聯營公司或合營公司的投資成本(見附註1(e))。

於本公司財務狀況表中,於子公司 投資按成本減減值虧損列賬(見附註 1(o))。

(d) Subsidiaries and non-controlling interests (Continued)

Non-controlling interests are presented in the consolidated statement of financial position within equity, separately from equity attributable to the equity shareholders of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated statement of profit or loss and the consolidated statement of profit or loss and other comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the equity shareholders of the Company. Loans from holders of non-controlling interests and other contractual obligations towards these holders are presented as financial liabilities in the consolidated statement of financial position in accordance with notes 1(s) or (t) depending on the nature of the liability.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (see note 1(h)) or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture (see note 1(e)).

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses (see note 1(o)).

(e) 聯營公司及合營公司

聯營公司指本集團及本公司可對其管理發揮重大影響力(包括參與其財務及經營決策)但並無控制或聯合控制的實體。

合營公司指根據本集團或本公司與其 他人士訂立的合約安排而經營的實 體,有關合約安排訂明本集團與其他 人士分佔對該安排的控制權,或有權 擁有該安排的淨資產。

於聯營公司或合營公司的投資按權 益法計入綜合財務報表,除非有關 投資歸類為持作出售類別(或分類為 持作出售所包括的出售組合)則作別 論(見附註1(ab))。根據權益法,投 資初步按成本入賬,並就本集團分佔 被投資方可識別淨資產於收購日的公 允價值超出投資成本的任何部分(如 有)作出調整,因此,投資已就本集 團分佔被投資方淨資產於收購後的變 動及有關投資的任何減值虧損作出調 整(見附註1(g)及1(o))。收購日期超 過成本的部分、本集團分佔被投資方 於收購後的除稅後業績及年內減值虧 損於綜合損益表中確認, 而本集團分 佔被投資方於收購後的除稅後其他全 面收益則於綜合損益及其他全面收益 表中確認。

倘本集團分佔聯營公司或合營公司的 虧損超過其權益,本集團的權益減至 零,並不再確認進一步虧損,惟本集 團須承擔法律或推定責任或代表被投 資方付款則除外。就此而言,本集團 的權益為按權益法計算的投資馬價 值連同實質屬本集團於聯營公司數長 質公司投資淨額之一部分的本集團長 期權益。

(e) Associates and joint ventures

An associate is an entity in which the Group or Company has significant influence, but not control or joint control, over its management, including participation in the financial and operating policy decisions.

A joint venture is an arrangement whereby the Group or Company and other parties contractually agree to share control of the arrangement, and have rights to the net assets of the arrangement.

An investment in an associate or a joint venture is accounted for in the consolidated financial statements under the equity method, unless it is classified as held for sale (or included in a disposal group that is classified as held for sale) (see note 1(ab)). Under the equity method, the investment is initially recorded at cost, adjusted for any excess of the Group's share of the acquisition-date fair values of the investee's identifiable net assets over the cost of the investment (if any). Thereafter, the investment is adjusted for the post acquisition change in the Group's share of the investee's net assets and any impairment loss relating to the investment (see notes 1(g) and 1(o)). Any acquisition-date excess over cost, the Group's share of the post-acquisition, post-tax results of the investees and any impairment losses for the year are recognised in the consolidated statement of profit or loss, whereas the Group's share of the post-acquisition post-tax items of the investees' other comprehensive income is recognised in the consolidated statement of profit or loss and other comprehensive income.

When the Group's share of losses exceeds its interest in the associate or the joint venture, the Group's interest is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the investee. For this purpose, the Group's interest is the carrying amount of the investment under the equity method together with the Group's long-term interests that in substance form part of the Group's net investment in the associate or the joint venture.

(e) 聯營公司及合營公司(續)

本集團與聯營公司或合營公司之間的 交易所產生的未變現損益均按本集團 於被投資方所佔的權益比率撇銷,惟 倘未變現虧損顯示已轉讓資產出現減 值,則該等未變現虧損即時在損益表 內確認。

倘於聯營公司的投資變為於合營公司 的投資或出現相反情況,則不會重新 計量保留權益。反之,該投資繼續根 據權益法入賬。

在其他所有情況下,倘本集團不再對聯營公司或合營公司有重大影響力或共同控制權,則本集團的權益按出售於被投資方的全部權益入賬,所產生的損益於損益表內確認。失去重大影響力或共同控制權當日於該原有被資方的任何保留權益按公允價值值,相關金額視為初步確認金融資產時的公允價值(見附註1(h))。

(f) 共同經營

本集團將其享有該安排個別相關資產 且承擔該安排個別相關負債的合營安 排劃為共同經營。

本集團在共同經營中確認以下要素:

- (i) 單獨持有的資產,以及按其份額共同持有的資產;
- (ii) 單獨承擔的負債,以及按其份額共同承擔的負債;
- (iii) 出售其享有的共同經營產出份額所產生的收入;

1 Significant accounting policies (Continued)

(e) Associates and joint ventures (Continued)

Unrealised profits and losses resulting from transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the investee, except where unrealised losses provide evidence of an impairment of the asset transferred, in which case they are recognised immediately in profit or loss.

If an investment in an associate becomes an investment in a joint venture or vice versa, retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method.

In all other cases, when the Group ceases to have significant influence over an associate or joint control over a joint venture, it is accounted for as a disposal of the entire interest in that investee, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former investee at the date when significant influence or joint control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (see note 1(h)).

(f) Joint operation

The Group classifies joint arrangements as joint operations when the Group has rights to the individual assets, and obligations for the individual liabilities, relating to the arrangement.

The Group recognises in relation to its interest in a joint operation:

- (i) its assets, including its share of any assets held jointly;
- (ii) its liabilities, including its share of any liabilities incurred jointly;
- (iii) its revenue from the sale of its share of the inventories arising from the joint operation;

本集團按照適用於特定資產、負債、 收入和費用的《國際財務報告準則》 對其在某項共同經營中享有權益相關 的資產、負債、收入和費用進行會計 處理。

(g) 商譽

商譽指以下兩者之差額

- (i) 所轉讓代價的公允價值、於被 收購方的非控股權益及集團過 往所持被收購方股權的總和; 及
- (ii) 被收購方可識別資產及負債於 收購當日計量的公允價值淨額。

倘(ii)大於(i),則差額於損益即時確認 為議價購買收益。

商譽按成本減累計減值虧損列賬。業務合併產生的商譽分配至預期受益於合併協同效益的各現金產生單位(或單位組別),並會每年進行減值測試(見附註1(o))。

倘年內出售現金產生單位,則所收購 商譽之應佔金額將計入出售損益。

(f) Joint operation (Continued)

- (iv) its share of the revenue from the sale of the inventories by the joint operation; and
- (v) its expenses, including its share of any expenses incurred jointly.

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the IFRSs applicable to the particular assets, liabilities, revenues and expenses.

(g) Goodwill

Goodwill represents the excess of

- (i) the aggregate of the fair value of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the group's previously held equity interest in the acquiree; over
- (ii) the net fair value of the acquiree's identifiable assets and liabilities measured as at the acquisition date.

When (ii) is greater than (i), then this excess is recognised immediately in profit or loss as a gain on a bargain purchase.

Goodwill is stated at cost less accumulated impairment losses. Goodwill arising on a business combination is allocated to each cash-generating unit, or groups of cash generating units, that is expected to benefit from the synergies of the combination and is tested annually for impairment (see note 1(o)).

On disposal of a cash generating unit during the year, any attributable amount of purchased goodwill is included in the calculation of the profit or loss on disposal.

(h) Other investments in equity securities

The Group's and the Company's policies for investments in equity securities, other than investments in subsidiaries, associates and joint ventures, are as follows:

Investments in equity securities are initially stated at fair value, which is their transaction price unless it is determined that the fair value of initial recognition differs from the transaction price and that fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that was only date from observable markets. Cost includes attributable transaction costs.

Investments in equity securities which are not held for trading are classified as available-for-sale securities. At the end of each reporting period the fair value is remeasured, with any resultant gain or loss being recognised in other comprehensive income and accumulated separately in equity in the fair value reserve. As an exception to this, investments in equity securities that do not have a quoted price in an active market for an identical instrument and whose fair value cannot otherwise be reliably measured are recognised in the statement of financial position at cost less impairment losses (see note 1(o)). Dividend income from equity securities is recognised in profit or loss in accordance with the policies set out in note 1(y)(v), respectively.

When the investments are derecognised or impaired (see note 1(o)), the cumulative gain or loss recognised in equity is reclassified to profit or loss. Investments are recognised/derecognised on the date the Group commits to purchase/sell the investments or they expire.

1 Significant accounting policies (Continued)

(i) Derivative financial instruments

Derivative financial instruments are recognised initially at fair value. At the end of each reporting period the fair value is remeasured. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss, except where the derivatives qualify for cash flow hedge accounting, in which case recognition of any resultant gain or loss depends on the nature of the item being hedged (see note 1(j)).

(j) Hedging

Cash flow hedges

Where a derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk of a committed future transaction, the effective portion of any gains or losses on remeasurement of the derivative financial instrument to fair value are recognised in other comprehensive income and accumulated separately in equity in the hedging reserve. The ineffective portion of any gain or loss is recognised immediately in profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gain or loss is reclassified from equity to profit or loss in the same period or periods during which the asset acquired or liability assumed affects profit or loss (such as when interest income or expense is recognised).

When a hedging instrument expires or is sold, terminated or exercised, or the Group revokes designation of the hedge relationship but the hedged forecast transaction is still expected to occur, the cumulative gain or loss at that point remains in equity until the transaction occurs and it is recognised in accordance with the above policy. If the hedged transaction is no longer expected to take place, the cumulative unrealised gain or loss is reclassified from equity to profit or loss immediately.

投資物業按成本減累計折舊及累計減 值虧損列賬。投資物業的租金收益按 附註1(y)(iv)所述入賬。

(k) Investment properties

Investment properties are buildings which are owned or held under a leasehold interest (see note 1(n)) to earn rental income and/or for capital appreciation. These include property that is being constructed or developed for future use as investment property.

Investment properties are stated at cost less accumulated depreciation and accumulated impairment loss. Rental income from investment properties is accounted for as described in note 1(y)(iv).

Depreciation is calculate to write off the costs of investment properties, less its residual value of 0% to 7%, if any, using the straight-line method over their estimated useful lives of 20 to 70 years. Both the useful life and residual value, if any, are reviewed annually.

(I) Property, plant and equipment

The following items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment loss (see note 1(o)):

- buildings held for own use which are situated on leasehold land classified as held under operating lease (see note 1(n)); and
- other items of plant and equipment.

The cost of self-constructed items of property, plant and equipment includes the cost of materials, direct labour, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads and borrowing costs (see note 1(aa)).

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

(m) Intangible assets (other than goodwill)

The Group recognises an infrastructure operating right arising from a service concession arrangement when it has a right to charge for use of the concession infrastructure. A public premise operating right received as consideration for providing construction services in a service concession arrangement is measured at fair value on initial recognition with reference to the fair value of the services provided. Subsequent to initial recognition, the public premise operating right is measured at cost, which includes capitalised borrowing costs (see note 1(aa)), less accumulated amortisation and impairment losses (see note 1(o)).

(n) 租賃資產

倘本集團認為一項安排(包括一項交易或系列交易)附帶權利可在一段協定時期內使用特定一項或多項資產,以作出一項或多項付款,則該安排屬於或包含租賃。有關決定乃根據該安排之內容評估作出,而不論該安排是否具備租賃的法律形式。

所有權全部風險和報酬實質上並未轉 移至本集團的租賃分類為經營租賃。

倘本集團擁有根據經營租賃所持資產的使用權,則除非有其他基準更能清楚反映該等租賃資產所產生利益的模式,否則租賃付款按租期所涵蓋的會計年期等額分期計入損益。收到的租賃優惠均於損益確認為租賃淨付款總額的組成部分。或有租金在產生的會計期內於損益扣除。

收購根據經營租賃所持土地的成本歸類為非流資產並按直線法在租期內攤銷,惟歸類為物業、廠房及設備(見附註1(I))或持作開發以供出售的產品(見附註1(p)(i))除外。

1 Significant accounting policies (Continued)

(m) Intangible assets (other than goodwill) (Continued)

Amortisation of intangible assets with finite useful lives is charged to profit or loss on a straight-line basis over the assets' estimated useful lives. The estimated useful life of a public premise operating right in a service concession arrangement is the period from when the Group is able to charge the public for the use of the infrastructure to the end of the concession period, which is 8 years. Both the period and method of amortisation are reviewed annually.

(n) Leased assets

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

Leases which do not transfer substantially all the risks and rewards of ownership to the Group are classified as operating leases.

Where the Group has the use of assets held under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals are charged to profit or loss in the accounting period in which they are incurred.

The cost of acquiring land held under an operating lease is classified as non-current assets and amortised on a straight-line basis over the period of the lease term except where the property is classified as a property, plant and equipment (see note 1(I)) or is held for development for sale (see note 1(p)(i)).

(i) 股本證券投資及其他應收款項減值

以成本或攤銷成本列賬或分類為可供 出售證券的股本證券投資及其他流動 及非流動應收款項會於各報告期末審 閱,以確定有否客觀減值證據。客觀 減值證據包括引起本集團注意的以下 一項或多項虧損事件的可觀察資料:

- 債務人重大財務困難;
- 違反合約,例如拖欠或逾期償還利息或本金;
- 債務人很可能破產或進行其他 財務重組;
- 技術、市場、經濟或法律環境 的重大改變對債務人有不利影響;及
- 股本工具投資的公允價值大幅 或長期下跌,以至低於其成本。

倘有證據顯示出現減值,則會按下列 方法釐定及確認減值虧損:

- 就使用權益法於綜合財務報表 入賬的聯營公司及合營公司(參 閱附註1(e))而言,根據附註 1(o)(ii)比較投資的可收回金額與 其賬面價值而計量減值虧損。 根據附註1(o)(ii),倘用以釐定 可收回金額的估計出現有利變 動,則會撥回減值虧損。

(o) Impairment of assets

(i) Impairment of investments in equity securities and other receivables

Investments in equity securities and other current and non-current receivables that are stated at cost or amortised cost or are classified as available-for-sale securities are reviewed at the end of each reporting period to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; and
- a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

If any such evidence exists, any impairment loss is determined and recognised as follows:

For investments in associates and joint ventures accounted for under the equity method in the consolidated financial statements (see note 1(e)), the impairment loss is measured by comparing the recoverable amount of the investment with its carrying amount in accordance with note 1(o) (ii). The impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount in accordance with note 1(o)(ii).

 - For unquoted equity securities carried at cost, the impairment loss is measured as the difference between the carrying amount of the financial asset and the estimated future cash flows, discounted at the current market rate of return for a similar financial asset where the effect of discounting is material. Impairment losses for equity securities carried at cost are not reversed.
 - For trade and other current receivables and other financial assets carried at amortised cost, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where these financial assets share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

- (o) Impairment of assets (Continued)
- (i) Impairment of investments in equity securities and other receivables (Continued)
 - For available-for-sale securities, the cumulative loss that has been recognised in the fair value reserve is reclassified to profit or loss. The amount of the cumulative loss that is recognised in profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss.

Impairment losses recognised in profit or loss in respect of available-for-sale equity securities are not reversed through profit or loss. Any subsequent increase in the fair value of such assets is recognised in other comprehensive income.

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of trade debtors included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

- (ii) Impairment of other assets

Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or, except in the case of goodwill, an impairment loss previously recognised no longer exists or may have decreased:

- property, plant and equipment;
- pre-paid interests in leasehold land classified as being held under an operating lease;
- intangible assets;
- goodwill; and
- investments in subsidiaries in the Company's statement of financial position.

If any such indication exists, the asset's recoverable amount is estimated. In addition, for goodwill, the recoverable amount is estimated annually whether or not there is any indication of impairment.

- Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

 - Recognition of impairment losses

An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs of disposal (if measurable), or value in use (if determinable).

- Reversals of impairment losses

In respect of assets other than goodwill, an impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

於中期期間已就商譽、可供出售股本證券及按成本列賬的無報價股本證券確認的減值虧損不會在後續期間所屬。即使僅在該中期期間所屬的財政年度完結時才評估減值並確認沒有虧損或所確認的虧損較少,也不會則預數值虧損。因此,倘若於年度期間的其餘時間或任何其他後續期間,則該增加會在其他全面收益而非在損益中確認。

(iii) Interim financial reporting and impairment

Under the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited, the Group is required to prepare an interim financial report in compliance with IAS 34, Interim financial reporting, in respect of the first six months of the financial year. At the end of the interim period, the Group applies the same impairment testing, recognition, and reversal criteria as it would at the end of the financial year (see note 1(o)).

Impairment losses recognised in an interim period in respect of goodwill, available-for-sale equity securities and unquoted equity securities carried at cost are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the end of the financial year to which the interim period relates. Consequently, if the fair value of an available-for-sale equity security increases in the remainder of the annual period, or in any other period subsequently, the increase is recognised in other comprehensive income and not profit or loss.

(p) Inventories

(i) Property development

Inventories in respect of property development activities are carried at the lower of cost and net realisable value. Cost and net realisable values are determined as follows:

Property held for development and property under development

The cost of properties held for development and properties under development comprises specifically identified cost, including the acquisition cost of land, aggregate cost of development, materials and supplies, wages and other direct expenses, an appropriate proportion of overheads and borrowing costs capitalised (see note 1(aa)). Net realisable value represents the estimated selling price less estimated costs of completion and costs to be incurred in selling the property.

Completed property for sale

In the case of completed properties developed by the Group, cost is determined by apportionment of the total development costs for that development project, attributable to the unsold properties. Net realisable value represents the estimated selling price less costs to be incurred in selling the property.

The cost of completed properties held for sale comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Construction materials are carried at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the construction materials to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(g) Construction contracts

Construction contracts are contracts specifically negotiated with a customer for the construction of an asset or a group of assets, where the customer is able to specify the major structural elements of the design. The accounting policy for contract revenue is set out in note 1(y)(iii). When the outcome of a construction contract can be estimated reliably, contract costs are recognised as an expense by reference to the stage of completion of the contract at the end of the reporting period. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately. When the outcome of a construction contract cannot be estimated reliably, contract costs are recognised as an expense in the period in which they are incurred.

Progress billings not yet paid by the customer are included under "Trade and other receivables". Amounts received before the related work is performed are presented as "Receipts in advance" under "Trade and other payables".

(r) Trade and other receivables

In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts.

(w) Income tax (Continued)

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

(w) Income tax (Continued)

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period. Deferred tax assets and liabilities are no discounted.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

(x) Financial guarantees issued, provisions and contingent liabilities

(i) Financial guarantees issued

Financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the "holder") for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Where the Group issues a financial guarantee, the fair value of the guarantee is initially recognised as deferred income within trade and other payables. The fair value of financial guarantees issued at the time of issuance is determined by reference to fees charged in an arm's length transaction for similar services, when such information is obtainable, or is otherwise estimated by reference to interest rate differentials, by comparing the actual rates charged by lenders when the guarantee is made available with the estimated rates that lenders would have charged, had the guarantees not been available, where reliable estimates of such information can be made. Where consideration is received or receivable for the issuance of the guarantee, the consideration is recognised in accordance with the Group's policies applicable to that category of asset. Where no such consideration is received or receivable, an immediate expense is recognised in profit or loss on initial recognition of any deferred income.

The amount of the guarantee initially recognised as deferred income is amortised in profit or loss over the term of the guarantee as income from financial guarantees issued. In addition, provisions are recognised in accordance with note 1(x)(ii) if and when (i) it becomes probable that the holder of the guarantee will call upon the Group under the guarantee, and (ii) the amount of that claim on the Group is expected to exceed the amount currently carried in trade and other payables in respect of that guarantee i.e. the amount initially recognised, less accumulated amortisation.

(x) Financial guarantees issued, provisions and contingent liabilities (Continued)

(ii) Other provisions and contingent liabilities

Provisions are recognised for other liabilities of uncertain timing or amount when the Group has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

(y) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Provided it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

(i) Sale of properties

Revenue arising from the sale of properties is recognised upon the signing of the sale and purchase agreement, the receipt of the deposits and confirmation of arrangement of settlement of remaining sales proceeds or the achievement of status ready for hand-over to customers as stipulated in the sale and purchase agreement, whichever is the later. (ii) Provision of services

Revenue from services is recognised when services are rendered

(iii) Contract revenue

When the outcome of a construction contract can be estimated reliably:

- revenue from a fixed price contract is recognised using the percentage of completion method, measured by reference to the percentage of contract costs incurred to date to estimated total contract costs for the contract; and
- revenue from a cost plus contract is recognised by reference to the recoverable costs incurred during the period plus an appropriate proportion of the total fee, measured by reference to the proportion that costs incurred to date bear to the estimated total costs of the contract.
- revenue from service concession arrangement is recognised by reference to the stage of completion of the contract. Operation or service revenue is recognised in the period in which services are provided by the Group (see note 1(y)(ii)).

When the outcome of a construction contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that it is probable will be recoverable.

(iv) Rental income from operating leases

Rental income receivable under operating leases is recognised in profit or loss in equal instalments over the periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the use of the leased asset. Lease incentives granted are recognised in profit or loss as an integral part of the aggregate net lease payments receivable. Contingent rentals are recognised as income in the accounting period in which they are earned.

(vii) Government grants

Grants that compensate the Group for expenses incurred are recognised as income in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Group for the cost of an asset are deducted from the carrying amount of the asset and consequently are effectively recognised in profit or loss over the useful life of the asset by way of reduced depreciation expense.

The results of foreign operations are translated into Renminbi at the exchange rates approximating the foreign exchange rates ruling at the dates of the transactions. Statement of financial position items are translated into Renminbi at the closing foreign exchange rates at the end of the reporting period. The resulting exchange differences are recognised in other comprehensive income and accumulated separately in equity in the exchange reserve.

On disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation is reclassified from equity to profit or loss when the profit or loss on disposal is recognised.

(aa) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of that asset. Other borrowing costs are expended in the period in which they are incurred.

The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or complete.

(ab)待出售非流動資產及停業單位

(i) 待出售非流動資產

若非流動資產(或處置群組)帳面價值的收回很可能是通過出售交易而非繼續使用,則將其分類為待出售,且該資產(或處置群組)於目前狀態可供立即出售。處置群組是指在監買中項交易中作為一個集體進行處置的多項資產的組合,以及將通過交易轉移,且與該等資產直接的負債。

本集團承諾的出售計畫涉及子公司喪 失控制權時,若符合上述分類為待出 售的條件,無論本集團於出售後是否 對前子公司保留非控制權益,應將該 子公司的所有資產及負債分類為待出 售。

在將非流動資產分類為待出售之前, 應立即對其(以及處置群組中的所有 個別資產及負債)的計量方式根據分 類前的會計政策進行更新。之後,在 初始分類至處置期間,非流動資產 (除以下規定的某些資產)或處置群 組,應按其帳面價值和公允價值減去 成本之間的低者入帳。目前,該計量 政策的主要例外情況,且本集團財務 報表及本公司最為關注有遞延税項資 產,僱員收益計畫產生的資產,金融 資產(於附屬公司、合營公司和聯營 公司的投資除外)和投資性房地產。 該等資產,即使劃為持有待售,人 就可按附注1列示的會計政策進行計 量。

非流動資產在剛分類為持有待售時產生的,及在持有待售期間因後續再計量產生的減值損失應確認為損益。只要非流動資產被劃分為持有待售,或為持有待售的處置群組的組成部分,則不可對其計提折舊或進行攤銷。

(ab) Non-current assets held for sale and discontinued operations

(i) Non-current assets held for sale

A non-current asset (or disposal group) is classified as held for sale if it is highly probable that its carrying amount will be recovered through a sale transaction rather than through continuing use and the asset (or disposal group) is available for sale in its present condition. A disposal group is a group of assets to be disposed of together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction.

When the group is committed to a sale plan involving loss of control of a subsidiary, all the assets and liabilities of that subsidiary are classified as held for sale when the above criteria for classification as held for sale are met, regardless of whether the group will retain a non-controlling interest in the subsidiary after the sale.

Immediately before classification as held for sale, the measurement of the non-current assets (and all individual assets and liabilities in a disposal group) is brought up-to-date in accordance with the accounting policies before the classification. Then, on initial classification as held for sale and until disposal, the non-current assets (except for certain assets as explained below), or disposal groups, are recognised at the lower of their carrying amount and fair value less costs to sell. The principal exceptions to this measurement policy so far as the financial statements of the group and the company are concerned are deferred tax assets, assets arising from employee benefits, financial assets (other than investments in subsidiaries, associates and joint ventures) and investment properties. These assets, even if held for sale, would continue to be measured in accordance with the policies set out elsewhere in note 1.

Impairment losses on initial classification as held for sale, and on subsequent remeasurement while held for sale, are recognised in profit or loss. As long as a non-current asset is classified as held for sale, or is included in a disposal group that is classified as held for sale, the noncurrent asset is not depreciated or amortised.

Classification as a discontinued operation occurs upon disposal or when the operation meets the criteria to be classified as held for sale (see (i) above), if earlier. It also occurs if the operation is abandoned.

Where an operation is classified as discontinued, a single amount is presented on the face of the statement of profit or loss, which comprises:

Operating segments, and the amounts of each segment item reported in the financial statements, are identified from the financial information provided regularly to the Group's most senior executive management for the purposes of allocating resources to, and assessing the performance of, the Group's various lines of business and geographical locations.

Individually material operating segments are not aggregated for financial reporting purposes unless the segments have similar economic characteristics and are similar in respect of the nature of products and services, the nature of production processes, the type or class of customers, the methods used to distribute the products or provide the services, and the nature of the regulatory environment. Operating segments which are not individually material may be aggregated if they share a majority of these criteria.

(a) Critical accounting judgements in applying the Group's accounting policies

In the process of applying the Group's accounting policies, management has made the following accounting judgments:

(i) Classification between subsidiaries, joint ventures and associates

The Group co-operated with certain third parties to engage in property development project through certain entities. In accordance with the respective co-operation agreements, the Group has the right to acquire certain percentage of the equity interest in these entities at a pre-determined price when certain conditions set out in these agreements are met. The Group has made judgment on the classification of these entities to subsidiaries, joint ventures or associates in accordance with the respective agreements and the involvement of the Group and the other parties in these entities. The Group will continuously evaluate the situation and such investments are accounted for in accordance with accounting policies set out in notes 1(d) and (e).

(ii) 劃分投資物業與業主自用物業

本集團釐定物業是否符合投資物業資 格, 並設定判斷標準。投資物業指為 獲得租金或資本增值或兩者兼得而持 有的物業。因此,本集團考慮物業是 否在很大程度上獨立於本集團所持其 他資產而產生現金流量。若干物業的 一部分為獲得租金或資本增值而持 有,另一部分則用於生產或提供貨品 或服務或用於管理用途而持有。倘有 關部分可單獨出售或根據融資租賃單 獨出租,則本集團將該部分單獨入 賬。倘有關部分不可單獨出售,則僅 於物業之極小部分用於生產或提供貨 品或服務或用於管理用途而持有的情 况下方確認物業為投資物業。本集團 就各項物業作出判斷,以釐定配套服 務是否重大以致物業不合資格作為投 資物業。

Accounting judgement and estimates (Continued)

- (a) Critical accounting judgements in applying the Group's accounting policies (Continued)
- (ii) Classification between investment properties and owner-occupied properties

The Group determines whether a property qualifies as an investment property, and has developed criteria in making that judgement. Investment property is a property held to earn rentals or for capital appreciation or both. Therefore, the Group considers whether a property generates cash flows largely independently of the other assets held by the Group. Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use in the production or supply of goods or services or for administrative purposes. If these portions could be sold separately or leased out separately under finance lease, the Group accounts for the portions separately. If the portions could not be sold separately, the property is an investment property only if an insignificant portion is held for use in the production or supply of goods or services or for administrative purposes. Judgement is made on an individual property basis to determine whether ancillary services are so significant that a property does not qualify as an investment property.

(iii) Classification between investment properties and properties held for sale

The Group develops properties held for sale and properties held to earn rentals and/or for capital appreciation. Judgement is made by management on determining whether a property is designated as an investment property or a property held for sale. The Group considers its intention for holding the properties at the early development stage of the related properties. During the course of construction, the related properties under construction are accounted for as properties under development included in current assets if the properties are intended for sale after their completion, whereas, the properties are accounted for as investment properties under construction if the properties are intended to be held to earn rentals and/or for capital appreciation.

2 會計判斷與估計(續)

(b) 估計不確定因素來源

附註14及33載有商譽減值及金融工 具公允價值之相關假設與風險因素。 估計不確定因素的其他主要來源如 下:

(i) 待售物業

按附註1(p)所解釋,本集團的待售物業按成本或可變現淨值(以較低者為準)列賬。本集團基於近期經驗及所涉物業的性質根據當前市況估計售價、擬發展物業與在建物業的完工成本以及物業銷售成本。

倘完工成本增加或銷售淨值減少,則 可變現淨值將會減少,可能導致須就 待售物業計提撥備。釐定該等撥備時 須運用判斷及估計。倘預期有別於原 先估計,則會相應調整該估計變動期 間物業的賬面價值及撥備。

此外,鑑於中國物業市場波動無常以 及個別物業的特性,實際成本與收入 或會高於或低於報告期末的估計。有 關撥備的增減會影響未來年度的損益 賬。

2 Accounting judgement and estimates (Continued)

(b) Sources of estimation uncertainty

Notes 14 and 33 contain information about the assumptions and their risk factors relating to goodwill impairment and fair value of financial instruments. Other key sources of estimation uncertainty are as follows:

(i) Properties for sale

As explained in note 1(p), the Group's properties for sale are stated at the lower of cost and net realisable value. Based on the Group's recent experience and the nature of the subject properties, the Group makes estimates of the selling prices, the costs of completion in cases for properties held for development and properties under development, and the costs to be incurred in selling the properties based on prevailing market conditions.

If there is an increase in costs to completion or a decrease in net sales value, the net realisable value will decrease and this may result in provision for properties for sale. Such provision requires the use of judgement and estimates. Where the expectation is different from the original estimate, the carrying value and provision for properties in the periods in which such estimate is changed will be adjusted accordingly.

In addition, given the volatility of the property market and the unique nature of individual properties, the actual outcomes in terms of costs and revenue may be higher or lower than that estimated at the end of the reporting period. Any increase or decrease in the provision would affect profit or loss in future years.

(除另有指示外,以人民幣千元列示)

(Expressed in thousands in Renminbi unless otherwise indicated)

2 會計判斷與估計(續)

(b) 估計不確定因素來源(續)

(ii) 土地增值税

按附註7(a)所解釋,本集團銷售所開發的物業須就土地增值按累進税。30%至60%繳納土地增值稅。根據有關法規,土地增值按物業的銷售收收到減可扣減開支(包括土地使用權租人實費用、借款成本及相關物業發展用支)計算。由於地方稅務機關採用的土地增值稅計算依據並不確定,故的土地增值稅計量依據並不確定,故估計金額的增減會影響未來年度的損益賬。

(iii) 貿易及其他應收款項減值

本集團估計因客戶無力還款而產生的 貿易及其他應收款項減值虧損。本集 團基於貿易及其他應收款項結餘的賬 齡、客戶信譽及過往撇銷紀錄進行估 計。倘客戶的財務狀況轉差,則實際 撥備會高於估計。

(iv) 確認遞延税項資產

Accounting judgement and estimates (Continued)

(b) Sources of estimation uncertainty (Continued)

(ii) LAT

As explained in note 7(a), LAT is levied on properties developed by the Group for sale, at progressive rates ranging from 30% to 60% on the appreciation of land value, which under the applicable regulations is calculated based on the proceeds of sales of properties less deductible expenditures including lease charges of land use rights, borrowing cost and relevant property development expenditures. Given the uncertainties of the calculation basis of land appreciation tax to be interpreted by the local tax bureau and the actual appreciation of land value may be different from the original estimates, the actual outcomes may be higher or lower than that estimated at the end of the reporting period. Any increase or decrease in estimates would affect profit or loss in future years.

(iii) Impairment for trade and other receivables

The Group estimates impairment losses for trade and other receivables resulting from the inability of the customers to make the required payments. The Group bases the estimates on the aging of the trade and other receivable balance, customer creditworthiness, and historical write-off experience. If the financial condition of the customers were to deteriorate, actual provisions would be higher than estimated.

(iv) Recognition of deferred tax assets

Deferred tax assets in respect of tax losses and other deductible temporary differences carried forward are recognised and measured based on the expected manner of realisation or settlement of the carrying amount of the assets, using tax rates enacted or substantively enacted at the end of the reporting period. In determining the carrying amounts of deferred tax assets, expected taxable profits are estimated which involves a number of assumptions relating to the operating environment of the Group and require a significant level of judgement exercised by the directors. Any change in such assumptions and judgement would affect the carrying amounts of deferred tax assets to be recognised and hence the net profit in future years.

3 Revenue and segment reporting (Continued)

(b) Segment reporting

The Group manages its business by divisions, which are organised by a mixture of both business lines (products and services) and geographical location. In a manner consistent with the way in which information is reported internally to the Group's most senior executive management for the purpose of resource allocation and performance assessment, the Group has presented the following five reportable segments.

- Property development (Beijing region/Guangshen region/Shanghai region/Central and Western region): given the importance of the property development division to the Group, the Group's property development business is segregated into four reportable segments on a geographical basis, as the divisional manager for each of these regions report directly to the senior executive team. All four segments derive their revenue mainly from development and sale of residential properties. Details about the cities covered by each of these regions are set out in note 3(b)(i).
- Property management: this segment provides property management and related services to purchasers and tenants of the Group's own developed residential properties and shopping arcades, as well as those developed by the external property developers.

(b) Segment reporting (Continued)

(i) Segment results and assets

For the purpose of assessing segment performance and allocating resources among segments, the Group's most senior executive management monitors the results attributable to each reportable segment on the following bases:

Segment assets include all tangible, intangible assets, other investments and current assets in Mainland China with the exception of deferred tax assets and other corporate assets.

Revenue and expenses are allocated to the reportable segments with reference to sales before sales related taxes generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments.

The measure used for reporting segment profit is the profit before PRC Corporate Income Tax ("CIT"), excluding share of profits or losses of associates or joint ventures, dividend income, other income and other operating expenses in Mainland China, but including the provision for doubtful debts and the profit arising from the inter-segment transactions. PRC Land Appreciation Tax ("LAT") which is considered directly attributable to the sale of properties is deducted from the segment profit for the review by the Group's most senior executive management.

13 Investment properties (Continued)

(a) Reconciliation of carrying amount (Continued)

The fair value of the Group's investment properties, together with leasehold land on which the investment properties located as set out in note 19, was approximately RMB27,664,596,000 (2015: RMB13,803,800,000) as at 31 December 2016 as determined by the directors of the Company with reference to the valuation performed, using the discounted cash flow ("DCF") approach and the direct market comparison ("DMC"), by Jones Lang LaSalle, an independent qualified professional valuer.

The valuation for completed investment properties was arrived at by considering the capitalised income derived from the existing tenancies and the reversionary potential of the properties or, where appropriate, by reference to market evidence of transaction prices for similar properties in the same locations and conditions as the Group's investment properties.

The valuation for investment properties under development was arrived at by making reference to comparable sales as available in the relevant market. The construction cost incurred, estimated construction cost to complete the development, discount rate and estimated developer's profit as at the date of valuation are also taken into account.

The fair value of the investment properties measured at the end of the reporting period is categorised into Level 3 valuations: Fair value measured using significant unobservable inputs, as defined in IFRS 13, Fair value measurement.

Statutory surplus reserve (Continued)

Statutory surplus reserve can be used to make up for previous years' losses, if any, and may be converted into share capital by the issue of new shares to equity shareholders in proportion to their existing shareholdings or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

For the year ended 31 December 2016, the Company did not transfer any of the Company's current year's net profit as determined in accordance with the PRC accounting rules and regulations, to this reserve (2015: transfer of RMB994,996,000 representing 10% of the Company's current year's net profit to this reserve).

Discretionary surplus reserve

The appropriation to the discretionary surplus reserve is subject to the shareholders' approval. The utilisation of the reserve is similar to that of the statutory surplus reserve.

(e) Capital management (Continued)

The Group monitors its capital structure on the basis of gearing ratio. This ratio is calculated as net debt divided by total equity of the Group. Net debt is calculated as total bank loans and borrowings from financial institutions and bonds payable less cash and cash equivalents and pledged and restricted deposits. The gearing ratio of the Group at 31 December 2016 and 2015 is calculated as follows:

(a) Credit risk

The Group's credit risk is primarily attributable to cash and cash equivalents, pledged and restricted deposits, trade and other receivables and other financial assets. Management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

Cash and cash equivalents and pledged and restricted deposits held by the Group are mainly deposited in financial institutions such as commercial banks which maintain sound reputation and financial situation. The credit risk is considered low. The Group sets deposit limits against the financial institutions' credit risks.

In respect of trade receivables, credit risk is minimised as the Group normally receives full payment from buyers before the transfer of property ownership.

In respect of amounts due from associates and joint ventures, the Group facilitates their capital demand by assessing and closely monitoring their financial conditions and profitability.

In respect of other receivables due from third parties, the Group reviews the exposures and manages them based on the need of operation.

At the end of the reporting period, 12.23% (2015: 16.40%) of the total trade receivables was due from the Group's five largest trade debtors.

Except for the financial guarantees given by the Group as set out in notes 35 and 36(e), the Group does not provide any other guarantees which would expose the Group to credit risk.

本集團利率風險主要來自銀行貸款及 金融機構借款,按浮動利率獲得的銀 行貸款及金融機構借款令本集團面對 現金流量利率風險。本集團計息借款 的利率及償還期限於綜合財務報表附 註25、26及27披露。

(c) Interest rate risk

The Group's interest rate risk arises primarily from its bank loans and borrowings from financial institutions. Bank loans and borrowings from financial institutions issued at variable rates expose the Group to cash flow interest rate risk. The interest rate and terms of repayment of the Group's interest-bearing borrowings are disclosed in notes 25, 26 and 27 to the consolidated financial statements.

敏感度分析

假定其他變量不變,2016年12月31日,本集團現金與銀行貸款及金融機構借款的利率增加50個基點估計會令本集團稅後利潤及總權益減少約人民幣111百萬元(2015年:人民幣86百萬元)。

對於報告期末本集團所持浮動利率非衍生工具引致之現金流量利率風險,本集團稅後利潤及總權益受到的影響估計為上述利率變動對利息開支或收入的年化影響。分析基準與2015年所採用者相同。

上述敏感度分析假定利率在報告期末 變動,且已應用於所有的浮動利率銀 行貸款及金融機構借款而不計及利息 資本化的影響。

(d) 貨幣風險

本集團外幣風險主要來自以美元、港 元及英鎊計值的現金及現金等價物、 可供出售證券、貿易及其他應收款 項、其他非流動資產及借款。

33 Financial risk management and fair values (Continued)

(c) Interest rate risk (Continued)

Sensitivity analysis

At 31 December 2016, it is estimated that a general increase of 50 basis points in interest rates of cash and bank loans and borrowings from financial institutions of the Group, with all other variables held constant, would have decreased the Group's profit after tax and total equity by approximately RMB111 million (2015: RMB86 million).

In respect of the exposure to cash flow interest rate risk arising from floating rate non-derivative instruments held by the Group at the end of the reporting period, the impact on the Group's profit after tax and total equity is estimated as an annualised impact on interest expense or income of such a change in interest rates. The analysis is performed on the same basis for 2015.

The sensitivity analysis above assumes that the change in interest rates had occurred at the end of the reporting period and had been applied to all floating rate bank loans and borrowings from financial institutions, without taking into account the impact of interest capitalisation.

(d) Currency risk

The Group is exposed to foreign currency risk primarily on cash and cash equivalents, available-for-sale securities, trade and other receivables, other non-current assets and borrowings which are denominated in United States Dollars, Hong Kong Dollars and Great Britain Pounds.

管理層認為新加坡元兑人民幣的匯率 波動不會對集團的損益及權益產生顯 著影響。

上述分析假定報告期末匯率變動,而 所有其他變量保持不變。本集團於香港或海外子公司持有以人民幣以外的 外幣計值的金融資產及負債並不在本 分析中考慮。

33 Financial risk management and fair values (Continued)

(d) Currency risk (Continued)

Based on the assumption that Hong Kong Dollars continue to be pegged to United States Dollars, management estimated that a 1% (2015: 1%) appreciation of United States Dollars/Hong Kong Dollars against Renminbi, the Group's profit would be decreased by approximately RMB39 million (2015: increased by RMB27 million) and the Group's equity would be decreased by approximately RMB88 million (2015: decreased by RMB112 million). Management estimated that a 1% (2015: 1%) appreciation of GBP against RMB, the Group's profit would be decreased by approximately RMB16 million (2015: increased by RMB9 million) and the Group's equity would be decreased by approximately RMB4 million (2015: increased by RMB9 million).

Management considered the fluctuation of Singapore Dollars to Renminbi would not have significant impact to the Group's profit or equity.

The analysis has been determined assuming that the change in foreign exchange rates had occurred at the end of the reporting period and that all other variables remain constant. Financial assets and liabilities denominated in currencies other than RMB held by subsidiaries of the Group in Hong Kong or overseas which the functional currencies are not RMB were not accounted for in the analysis.

 Fair value hierarchy

The following table presents the fair value of the Group's financial instruments measured at the end of the reporting period on a recurring basis, categorised into the three-levels fair value hierarchy as defined in IFRS 13, Fair value measurement. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: fair value measured using only level 1 inputs i.e. unadjusted quoted prices in active markets for identical financial instruments.
- Level 2 valuations: fair value measured using level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.
- Level 3 valuations: fair value measured using significant unobservable inputs.

35 或有負擔

本集團就買家按揭貸款購置物業向銀行提供擔保,截至報告期末,未到期銀行擔保為人民幣111,187百萬元(2015年:人民幣68,766百萬元),其中人民幣111,163百萬元的擔保(2015年:人民幣68,712百萬元)將於買家辦妥物業法定業權轉讓手續後終止,人民幣24百萬元的擔保(2015年:人民幣54百萬元)將於買家悉數償還銀行按揭貸款後終止。

董事認為,本集團因該等擔保蒙受損失的可能性甚微,原因是倘置業者拖欠款項,銀行有權出售物業,以出售所得款項收回未償還貸款結餘。董事認為該等擔保的公允價值可忽略不計,因此本集團並無就該等擔保確認任何遞延收益。

此外,本集團於日常業務過程中成為 若干法律訴訟的被告及其他訴訟的原 告。雖法律訴訟或其他訴訟等或有事 項的結果尚無法確定,但管理層認為 該等或有事項引致的責任不會對本集 團的財務狀況及經營業績有重大不利 影響。

本集團為若干聯營公司發出的財務擔保詳情載於附註36(e)。

35 Contingent liabilities

As at the end of the reporting period, the Group has issued guarantees to banks to secure the mortgage arrangement of property buyers. The outstanding guarantees to the banks amounted to RMB111,187 million (2015: RMB68,766 million), including guarantees of RMB111,163 million (2015: RMB68,712 million) which will be terminated upon the completion of the transfer procedures with the buyers in respect of the legal title of the properties, and guarantees of RMB24 million (2015: RMB54 million) which will be terminated upon full repayment of mortgage loans by buyers to the banks.

The directors do not consider it probable that the Group will sustain a loss under these guarantees as the bank has the rights to sell the property and recovers the outstanding loan balance from the sale proceeds if the property buyers default payment. The Group has not recognised any deferred income in respect of these guarantees as its fair value is considered to be minimal by the directors.

In addition, the Group is the defendant in certain lawsuits as well as the plaintiff in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position or operating results of the Group.

Details of the financial guarantees issued by the Group for certain associates are set out in note 36(e).

(i) 《國際財務報告準則》第15號 — 源自客戶合同的收入

國際會計準則理事會頒佈了一條收入 確認的新準則,該準則將取代《國際 財務報告準則》第18號一商品及服 務合同及第11號一建造合同。新準 則適用的原則為收入在商品或服務的 控制權轉移給客戶時才予以確認,並 允許在採用該準則時使用追溯法或改 良型追溯法。

管理層目前正在評估採用該項新準則 將對合併財務報表產生的影響,並識 別出下列可能受到影響的方面:

服務收入一《國際財務報告準則》第15號的運用可能要求對單獨的履行義務進行認定,因此影響收入確認的時間。

41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)

The Group is in the process of making an assessment of what the impact of these amendments and new standards is expected to be in the period of initial application. So far the Group has identified some aspects of the new standards which may have a significant impact on the consolidated financial statements. Further details of the expected impacts are discussed below. As the Group has not completed its assessment, further impacts may be identified in due course and will be taken into consideration when determining whether to adopt any of these new requirements before their effective date and which transitional approach to take, where there are alternative approaches allowed under the new standards.

(i) IFRS 15, Revenue from contracts with customers

The IASB has issued a new standard for the recognition of revenue. This will replace IAS 18 which covers contracts for goods and services and IAS 11 which covers construction contracts. The new standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer. The standard permits either a full retrospective or a modified retrospective approach for the adoption.

Management is currently assessing the effects of applying the new standard on the Group's consolidated financial statements and has identified the following areas that are likely to be affected:

revenue from service – the application of IFRS
 15 may result in the identification of separate performance obligations which could affect the timing of the recognition of revenue.

 - 退還權利一《國際財務報告準則》第15號要求將從客戶處收回商品的權利及退款的義務單獨在資產負債表上列報。

目前,本集團無法對該新準則將對合併財務報表帶來的影響進行估計,且將就其對未來12個月份的影響進行詳細的評估。

《國際財務報告準則》第15號須於自 2018年1月1日或之後開始的財政年 度內強制實施。本集團未打算在其生 效日前進行採用。

At this stage, the Group is not able to estimate the impact of the new rules on the Group's consolidated financial statements. The Group will make more detailed assessments of the impact over the next twelve months.

IFRS 15 is mandatory for financial years commencing on or after 1 January 2018. At this stage, the Group does not intend to adopt the standard before its effective date.

(ii) 《國際財務報告準則》第9號 -金融工具

《國際財務報告準則》第9號將取代現行的金融工具會計處理準則,即《國際財務報告準則》第39號一金融工具:確認與計量。《國際財務報告準則》第9號就金融工具的確認與計量提出了新的要求,另一方面,它在未造成實質性變更的基礎上,整合了第39條對金融工具的確認與終止確認和金融負債的分類作出的要求。該項新準則預計將對本集團中財務報表造成以下影響:

(a) 金融工具的分類與計量

《國際財務報告準則》第9號將金融資產劃入下列三個主要範疇:(1)按攤銷成本計量的金融資產,(2)按公允價值計量且計入當期損益的金融資產,和(3)按公允價值計量且計入其他全面收益(FVTOCI)的金融資產:

41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)

(ii) IFRS 9, Financial instruments

IFRS 9 will replace the current standard on accounting for financial instruments, IAS 39, Financial instruments: Recognition and measurement. IFRS 9 introduces new requirements for classification and measurement of financial assets, calculation of impairment of financial assets and hedge accounting. On the other hand, IFRS 9 incorporates without substantive changes the requirements of IAS 39 for recognition and derecognition of financial instruments and the classification of financial liabilities. Expected impacts of the new requirements on the Group's consolidated financial statements are as follows:

(a) Classification and measurement

IFRS 9 contains three principal classification categories for financial assets: measured at (1) amortised cost, (2) fair value through profit or loss (FVTPL) and (3) fair value through other comprehensive income (FVTOCI) as follows:

 The classification for debt instruments is determined based on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the asset. If a debt instrument is classified as FVTOCI then effective interest, impairments and gains/losses on disposal will be recognised in profit or loss.

- (ii) 《國際財務報告準則》第9號 -金融工具(續)
 - (a) 金融工具的分類與計量(續)
 - 對權益性證券而言,無論 實體採取何種經營模式, 都應將其劃為按公允價值 計量且計入當期損益的金 融資產。除非該項資產為 非持有待售 金融資產,且 該實體通過股東大會投票 不可撤銷的將其指定為按 公允價值計量且計入其他 全面收益的金融資產。如 權益性證券被劃為按公允 價值計量且計入其他全面 收益的金融資產,則只有 股息收入計入當期損益, 預期相關的利得、損失和 減值準備都將在其他全面 收益中確認且不可轉回。

根據初步的評估,本集團預計 其目前按攤銷成本計量,和按 公允價值計量且計入當期損益 的金融資產將在採用《國際財務 報告準則》第9號後延續各自的 計量方式。

- 41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)
- (ii) IFRS 9, Financial instruments (Continued)
 - (a) Classification and measurement (Continued)
 - For equity securities, the classification is FVTPL regardless of the entity's business model. The only exception is if the equity security is not held for trading and the entity irrevocably elects to designate that security as FVTOCI. If an equity security is designated as FVTOCI then only dividend income on that security will be recognised in profit or loss. Gains, losses and impairments on that security will be recognised in other comprehensive income without recycling.

Based on the preliminary assessment, the Group expects that its financial assets currently measured at amortised cost and FVTPL will continue with their respective classification and measurements upon the adoption of IFRS 9.

- 41 已頒佈但於截至2016年12 月31日止年度尚未生效的修 訂、新準則及詮釋的可能影響 (續)
- (ii) 《國際財務報告準則》第9號 -金融工具(續)
 - (a) 金融工具的分類與計量(續)

就本集團目前被劃分為「可供出 售」金融資產而言,本集團在向 《國際財務報告準則》第9號過渡 期間,可能將其劃分為按公允 價值計量且計入當期損益的金 融資產,或涌過選舉不可撤銷 的將其指定為按公允價值計量 且計入其他全面收益的金融資 產(不能轉回)。目前為止,本 集團尚未確定做何種劃分。由 於本集團當前的會計政策規定 將可供出售金融資產公允價值 的變動計入其他全面收益,且 在資產處置或減值時再將利得 或損失轉出計入當期損益(參見 附注1(h)和1(o)),以上任何一種 劃分都將對本集團的會計政策 造成變更。該會計政策的變更 對本集團的淨資產及全面收益 總額無影響,但將對與經營表 現相關(如每股盈利能力)的金 額造成影響。

《國際財務報告準則》第9號對金融負債的分類與計量要求大致與第39號相同。但第9號要求將按公允價值計量且計入當期員益的金融負債因其自身確認為其他全面收益(不得重分類為損益)。由於本集團未持有任何拉公允價值計量且計入當期損益的金融負債,因此採用該項新準則對本集團無影響。

- 41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)
- (ii) IFRS 9, Financial instruments (Continued)
 - (a) Classification and measurement (Continued)

With respect to the Group's financial assets currently classified as "available-for-sale", these are investments in equity securities which the Group may classify as either FVTPL or irrevocably elect to designate as FVTOCI (without recycling) on transition to IFRS 9. The Group has not yet decided whether it will irrevocably designate these investments as FVTOCI or classify them as FVTPL. Either classification would give rise to a change in accounting policy as the current accounting policy for available-for-sale equity investments is to recognise fair value changes in other comprehensive income until disposal or impairment, when gains or losses are recycled to profit or loss in accordance with the Group's policies set out in notes 1(h) and 1(o). This change in policy will have no impact on the Group's net assets and total comprehensive income but will impact on reported performance amounts such as profit and earnings per share.

The classification and measurement requirements for financial liabilities under IFRS 9 are largely unchanged from IAS 39, except that IFRS 9 requires the fair value change of a financial liability designated at FVTPL that is attributable to changes of that financial liability's own credit risk to be recognised in other comprehensive income (without reclassification to profit or loss). The Group currently does not have any financial liabilities designated at FVTPL and therefore this new requirement may not have any impact on the Group on adoption of IFRS 9.

(b) 資產減值

(c) 套期保值會計

《國際財務報告準則》第9號未對第39號計量與確認無效性相關的要求進行基本性的變更,但增加了合格交易與套期保值會計的靈活性。本集團初步估計,採用《國際財務報告準則》第9號後,其目前的對沖關係將繼續保持,且相應的會計處理所受影響不大。

- 41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)
- (ii) IFRS 9, Financial instruments (Continued)

(b) Impairment

The new impairment model in IFRS 9 replaces the "incurred loss" model in IAS 39 with an "expected credit loss" model. Under the expected credit loss model, it will no longer be necessary for a loss event to occur before an impairment loss is recognised. Instead, an entity is required to recognise and measure expected credit losses as either 12-month expected credit losses or lifetime expected credit losses, depending on the asset and the facts and circumstances. This new impairment model may result in an earlier recognition of credit losses on the Group's trade receivables and other financial assets. However, a more detailed analysis is required to determine the extent of the impact.

(c) Hedge accounting

IFRS 9 does not fundamentally change the requirements relating to measuring and recognising ineffectiveness under IAS 39. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting. The Group preliminarily assesses that its current hedge relationships will qualify as continuing hedges upon the adoption of IFRS 9 and therefore it expects that the accounting for its hedging relationships will not be significantly impacted.

- 41 已頒佈但於截至2016年12 月31日止年度尚未生效的修 訂、新準則及詮釋的可能影響 (續)
- (iii)《國際財務報告準則》第16號 租賃

由於《國際財務報告準則》第16號消除了經營性租賃與融資性租賃的區別,這將導致幾乎所有租賃都將在資產負債表中確認。根據新的準則,一項資產(使用租賃物的權利)和需要支付租金的金融負債都需要進行確認,短期、價值低的租賃除外。

該準則對出租人的會計處理影響不 大。

該項新準則主要對本集團經營性租賃的會計處理造成影響。截至報告當日,本集團負有不可撤銷的經營性租賃承擔。然而,本集團目前尚未確定該等承擔將對用於未來支付的資產和負債確認造成影響的範圍,以及它們如何對本集團的利潤和現金流量劃分造成影響。

上述承擔有些可能包括短期且低值的租賃,有些可能與根據《國際財務報告準則》第16號不能劃分為租賃的安排相關。

該項新準則須強制運用於自2019年1 月1日或以後日期開始的財政年度。 目前,本集團未打算提前採用。

目前為止,不存在其他未生效且預計 將對本集團造成重大影響的《國際財 務報告準則》。

- 41 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2016 (Continued)
- (iii) IFRS 16, Leases

IFRS 16 will result in almost all leases being recognised on the balance sheet, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases.

The accounting for lessors will not significantly change.

The standard will affect primarily the accounting for the Group's operating leases. As at the reporting date, the Group has non-cancellable operating lease commitments. However, the Group has not yet determined to what extent these commitments will result in the recognition of an asset and a liability for future payments and how this will affect the Group's profit and classification of cash flows.

Some of the commitments may be covered by the exception for short-term and low-value leases and some commitments may relate to arrangements that will not qualify as leases under IFRS 16.

The new standard is mandatory for financial years commencing on or after 1 January 2019. At this stage, the Group does not intend to adopt the standard before its effective date.

There are no other IFRSs that are not yet effective that would be expected to have a material impact on the Group.
